**AESTHETIC, INDIVIDUAL AND FUNCTIONAL:**

**SCALE – our new design language**

LEDVANCE stands for innovation. This innovation is manifested in our new SCALE design language which won the 2019 German Design Award.

SCALE brings together ambitious design with a value that is noticeable in every creation – and ensures that the luminaire is a design product even when it’s switched off.
The guestrooms should radiate atmosphere and relaxation. Good hotel room lighting structures the room, enhances the design and underlines comfortable living.

INDIRECT LIGHTING
LED strips gently brighten the room, creating a cozy atmosphere.

SMART FUNCTIONS
GLOWdim LED lamps provide a particularly warm light and cozy atmosphere when dimmed down.

ATMOSPHERIC ROOM LIGHTING
Dimmable LED spotlights for lighting to suit your requirements.

PLEASANT AMBIENCE
- Light as a feel-good factor for guests
- Balanced combination of general and accent lighting
- Multi-functional lighting for different purposes: living, working, sleeping and relaxing
A COMFORTABLE EXPERIENCE – LEDVANCE LIGHTING SOLUTIONS

1 SWIVEL LED RECESSED SPOTLIGHTS
Pretty functional and flexible: with LED spotlights you can provide lighting and design accents in the hotel room.

2 VINTAGE LED LAMPS/LUMINAIRES
Very atmospheric, subtle and aesthetic: high-quality retro design meets LED technology, creating a special setting.

3 FLEXIBLE LED STRIPS
Creative lighting design in any shape: LED strips are integrated into the architecture and subtly enhance the room.

4 LED LAMPS WITH SPECIAL FUNCTIONS
Dim the light color and create an even warmer ambience with OSRAM GLOWdim technology.

Bathroom: lighting solution with LED strips cleverly integrated into the ceiling creates bright background lighting in the bathroom.

Sleeping area: pendant luminaires and LED spotlights – cozy atmosphere through a combination of diffuse light and lighting accents.

Multi-faceted lighting design in the hotel room: indirect, atmospheric over-bed lighting, supplemented by dimmable bedside lamps for reading; bright light for working at the desk.

Living area: indirect lighting and subtle lighting accents to wind down and relax.

1 SWIVEL LED RECESSED SPOTLIGHTS
Spot Round, Spot Square Adjust

2 VINTAGE LED LAMPS/LUMINAIRES
OSRAM Vintage Edition 1906

3 FLEXIBLE LED STRIPS
LED Strip Superior Class

4 LED LAMPS WITH SPECIAL FUNCTIONS
OSRAM PARATHOM® + GLOWdim

1906 glass luminaires
Dim the light color and create an even warmer ambience with OSRAM GLOWdim technology.
IN THE RESTAURANT: LIGHT TO SUIT YOUR TASTE

Light is the key to creating the right atmosphere, whether in a five-star restaurant or a trendy local bar. Subdued accent lighting at tables produces an intimate vibe, while light/dark contrasts help to create an attractive overall spatial concept. Walkways, service areas and other places where activities are carried out are high-functionality zones so they should be brightly lit.

STAGING
– Flexible accent lighting for the tables
– Interplay between light and shadow using different beam angles and illuminance levels

ACCENTING
Swivel-mounted LED spots are directed at the walls to provide indirect lighting in the room.

ATMOSPHERIC LIGHTING AND HIGH FUNCTIONALITY
– Light supports the restaurant concept as a design factor.
– Adequate lighting in the walkways helps ensure reliable table service.
– Balanced combination of general and accent lighting.
– Appetizing effect: light sources with very good color rendering.
**IN FOR A TREAT – LEDVANCE LIGHTING SOLUTIONS**

1 **SWIVEL-MOUNTED LED SPOTS**
An extremely clever choice: minimalist styling and great flexibility in lighting design – these small recessed spotlights can be realigned as required.

2 **FLEXIBLE RECESSED LED SPOTLIGHTS**
Stylish and movable: the compact Spot Vario combines accent and general lighting for full functionality in restaurant settings.

3 **PRECISION LIGHTING**
Tracklight Spot and Tracklight Spot Compact can be freely positioned along the power rail to create highlights in bars or restaurants.

4 **VINTAGE EDITION 1906**
Retro is modern: innovative LED technology in special shapes – beautiful light, elegant design and numerous classic lamps and luminaires.
IN THE LOBBY: WELCOMING LIGHT

Reception areas and foyers should be emphasized with light because they are generally the first places that guests see. Combine different types of lighting to create a good effect. Also remember that light should be used to guide guests to where they need to be.

An attractive mix: background, accent, direct and indirect lighting – outstandingly inconspicuous.

Light for emphasis: spotlights highlight the reception desk, while lighting strips on the ceiling make the area inviting.

ORIENTATION AND STAGING: LEDVANCE LIGHTING SOLUTIONS

1 GENERAL AND ACCENT LIGHTING EVEN IN HIGH LOBBIES
High-intensity swivel spotlights (1, 2 or 3-lamp versions).

2 HIGH VISUAL COMFORT AT RECEPTION
Low-glare general lighting and white light color – adjustable from warm to cold.

3 FLEXIBLE AND ADAPTABLE
Rotates through 350° and also tilts for fully adjustable lobby lighting.

4 INDIRECT AND DIRECT CONTOUR LIGHTING
LED strips provide discreet accent lighting or bright light for the entire room – depending on the luminous flux.
CONFERENCE ROOMS: PROFESSIONAL LIGHTING

Flexibility is what’s needed here: different types of luminaire, various light colors, direct and indirect light in combination with a lighting control system can cover a wide range of meeting situations and activities.

HIGHLIGHTING OUR EXPERTISE – LEDVANCE LIGHTING SOLUTIONS

1 WORK LIGHT
Designer pendant luminaires with state-of-the-art lighting technology: direct and indirect light from one luminaire for optimum lighting at conference tables.

2 GENERAL LIGHTING
Fully focused on the task at hand: wide-beam downlights provide very bright and uniform light.

3 ACCENT LIGHTING
Modern design and exciting lighting effect: tilt and swivel spotlights provide special accents and highlight the room architecture.

4 CEILING LIGHTING
Excellent glare-free panels provide high visual comfort at laptops and PCs in meetings.

ATTENTION AND WELL-BEING
- The direct light from the pendant luminaires supports focused working at the conference table
- Indirect light contributes to a pleasant atmosphere

ADJUSTABLE LIGHTING
- Tilt and swivel luminaires provide focused lighting and enable flexible room design

Bright and uniform lighting in the conference room through LED strips or LED panels can increase concentration in meetings.
ANCILLARY AREAS: FUNCTION MEETS DESIGN

Ancillary areas such as corridors, elevators and car parks require bright and functional lighting which blends stylishly into the overall design – because guests should always feel comfortable.

**FUNCTIONAL HIGHLIGHTS**
Task-based lighting provides orientation, particularly highlighting the space at the same time.

**ATTRACTION LIGHTING POINTS THE WAY**

1. **CORRIDORS AND ELEVATORS**
The right balance between bright lighting and special lighting accents points the way and makes waiting times particularly pleasant.

2. **CAR PARKS**
Lighting design as bright and uniform as possible with no dark zones provides easier orientation and above all a feeling of safety.

3. **OUTDOOR AND WELLNESS AREAS**
These areas should be sufficiently lit especially during night-time use; but they also offer ideal potential for exciting highlights.
INTERIOR DESIGN WITH MODERN LED TECHNOLOGY

Case study Radisson Blu Hotel Frankfurt In the “Modern Serenity” and “Classic Monochrome” suites the lighting solution is part of the sophisticated interior design concept.

- LED spotlights as warm white accent lighting in all areas effectively enhance the modern interior.
- Stylish lighting accents – installed as mirror lighting, the OSRAM Globe LED lamps with PenduLum Pro bases are retro eye-catchers.
- Cove lighting with flexible OSRAM LED strips – uses pleasant indirect light to underline the cozy atmosphere.

OUR EXPERTISE –
experienced, pragmatic, goal-oriented
More than 100 years of industry experience meets innovative technology know-how. And renowned lighting projects will boost our practical experience in the future.
