Product remark	All technical parameters apply to the entire lamp / Due to the comproduction process for light-emitting diodes, the typical values she for the technical LED parameters are purely statistical values that not necessarily match the actual technical parameters of each individual product, which can vary from the typical value / LED lan contain several electronic components. Under unfavourable cond these can lead to acoustic noise. In case of resonance even low r can cause audible effect. Possible factors influencing this are the installation, the design of the lamp holder and the luminaire (acous resonance effect) as well as the dimmer or the transformer (harmor or electronic resonance)
